

4.2.4. Percentage per day usage of library by teachers and students (foot falls and login data for online access) during the latest completed academic year (2020-21).

- Brief Introduction about the Calculation
- log book entries
- Data for online access for the teachers and students using library for the year

Users' Footfall and Online Usage Statistics

Calculating Usage Statistics is a very complex process. It is practically impossible to count every visit of the faculty and students due to hybrid nature of library services and especially during COVID-19 period. In spite of all its best efforts, no library can fetch actual usage data more than 50 percent. Usage statistics is not generated for many online resources. The library provides many services through emails, through social media tools like WhatsApp for all users but no statistics is generated for such usage. Similarly, library serve individual users' on need basis through various means including photocopying, sharing in pen-drive or through google drive, share online textbooks to all students and faculty and distribute physical books to all students and faculty but none of these usages are counted. Moreover, post Covid-19, users' entry were highly restricted inside the library and library served them in multiple ways which were not recorded.

Library subscribes number of databases and there are multiple ways of reaching to the database pages e.g. through library website, going on individual pages or requesting library to provide precise information. Similarly, library sends various online newspapers, journals, magazines, articles etc. on daily basis through email and no statistics is generated for individual viewing and downloading of pages.

For the current purpose, therefore, library has counted only physical footfall during working days, visits on ILMS webpage and visits on Digital library pages, Ebsco Databases usage during the given period and J-Gate database usage during the given period for calculating the per day usage of the library. Usage of Emerald, all databases of journals and e-books which were shared with users on trial basis and for which statistics couldn't be generated and ProWess usage are not included in this calculation. Actual usage of the library will be many folds at least 200 per day than the given average of 78.28 but for available data, following formula is used.

Per Day Usage = Physical footfall numbers/working days + Total Visitors on ILMS Webpage/Total number of days when counter was installed + Total Visitors on Digital Library Website/Total number of days when counter was installed + Ebsco Databases Usage Per day + J-Gate database usage per day

- Number of physical users accessing the library (Datashet attached)
- Number of users using the library through e-access (Datashets attached)
- Ebsco Database usage (Datashet Attached)
- J-Gate Database usage (Datashet Attached)
- Library Website Statistics Screenshot (Attached)
- Digital Library Usage Statistics Screenshot (Attached)
- Library Web-Opac Page Statistics Screenshot (Attached)

Per Day Usage = Physical footfall numbers/working days + Total Visitors on ILMS Webpage/Total number of days when counter was installed + Total Visitors on Digital Library Website/Total number of days when counter was installed + Total Visitors on

Jitendra Sharma.

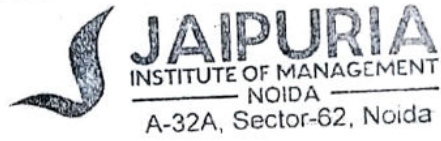

**Library Website/Total number of days when counter was installed + Ebsco Database usage
Per Day Details + J-Gate Database Usage Per Day Details**

Per Day Usage $9 + 3 + 25 + 5 + 93 + 2 = 137$

File Description

- Upload details of library usage by teachers and students (Attached)
- Any additional information

Jitender Sharma.
